Our system embraces fifty-three thousand acres of fine cultivated land in the heart of the Uintah Basin

Mr. Geo. M. Bacon, State Engineer
Capitol Building
Salt Lake City, Utah

Dear Mr. Bacon:

I am writing you thinking that you will be wondering what has become of our Commissioner deal that we were on with the Government.

As I remember, the last we were at your office, Mr. Hacking and I called your attention to a change we were asking in the Waiver they had submitted. Mr. Humphreys of the local office referred this matter to Denver. Mr. Trusdale at Denver referred it to Washington. When Mr. Trusdale referred this matter to Washington, Mr. Post wrote Mr. Engle, suggesting that we get together on a temporary arrangement without referring to any ones rights, nor was the State Engineer to be in the arrangement. This we didn't care to do, as we felt the need for a boss on the job. Last Monday, our committee, with Mr. Henderson, the local Project Engineer, got together and worked out what we thought was an agreement that should satisfy them but this also was rejected. Now we are calling our people together again next Monday, April 13th and, if at that meeting we are unable to get together, our committee has decided to ask you to take the matter over and appoint us a Commissioner.

I wondered if you would care to come to Roosevelt and meet with us next Monday and try to help us unravel this matter. If you could see your way clear to meet with us, we would appreciate very much having you with us and having the benefit of your experience in handling matters of this kind. If you are unable to come out, we would like to have a letter, making any suggestion you may care to make.

Hoping to either have you with us or hear from you, I am

Yours very truly,

H. L. Allred
Chairman Executive Committee
Associated Water Users.
